ABOUT

I aim to contribute the highest value to my working environment and by doing so improve myself. I work on front end development; includes building various web projects using variety of web technologies by considering UX and user behaviour while implementing interactive & responsive interfaces.

I am comfortable with Javascript ES6-ESNext and adapting libraries & frameworks such as React.js/Next.js, Vue.js/Nuxt.js in addition to HTML5, CSS3(SCSS). I actively use modern JS toolsets – webpack, babel, npm environment. I have experience on both providing and consuming RESTful API via JSON. I endure project management principles on agile / scrum and able to use Git.

SKILLS

Front end - Semantic HTML5, CSS3 (SCSS, BEM, CSS modules, styled components), JavaScript ES6 & ESNext, React.js / Next.js, Vue.js / Nuxt.js, single page application (SPA).
Web & mobile responsive solutions with browser version and cross-platform compatibility.
Adobe PS & XD.
Modern JS Toolset (Webpack, babel, npm environment).

Programming paradigms - Functional programming, Object-oriented programming,

Security practices - XSS, CSRF, CSP.

Management - Git, agile / scrum workflow, software development lifecycle (SDLC), managing tasks & meeting deadlines, ability to take initiative, documenting.

Back end - Node.js / Express.js, SQL & NoSQL, ORM, PHP / Laravel.

EXPERIENCE

2022.03 - 2021.03

Front End Developer
Crema Communication Services LTD, Remote / Turkey

· Developing various web projects mostly in finance industry from initial design through completion.
